Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/713,045

Applicant(s)

ALBRIGHT, CHRISTOPHER

Examiner

David L. Sorkin

Art Unit

1723

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 and 20-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 4, 12, 18 and 23 is/are allowed.
- 6) ☒ Claim(s) 1-3, 5-9, 13-17, 20, 22 and 25-32 is/are rejected.
- 7) ☒ Claim(s) 10, 11, 21 and 24 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01 March 2006 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 15-17, 20, 22, 27 and 30-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. Regarding independent claim 15, the new negative limitation "unsupported by external supports" is not described in the original filing. Regarding new independent claim 32, there is no description of "each of the first and second sides being nearer to the auger than each of the third and fourth sides" in the original filing.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1723

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 5-9, 13, 14, 25, 26, 28 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 985 342. Regarding claims 1, EP '342 discloses a mixing apparatus for mixing livestock feed, said apparatus comprising a container (1) for the reception of feed; said container including a floor (6), a wall extending away from the floor, such that substantially all of said wall is disposed above the floor, said wall defining a top opening remote from the floor, said floor and said wall defining an enclosure (see Fig. 1); a discharge opening (51) in said wall; and an auger (2,3) disposed within said enclosure, said auger having an axis of rotation extending substantially vertically through the floor, said wall further including a first side (right side in Fig. 1) and a second side (left side in Fig. 1) positioned on opposing sides of the enclosure, said sides being disposed at dissimilar angles to said floor (see Fig. 1). Claims 1 and 28 discuss an intended direction of travel during an intended use; however, "the manner or method in which such machine is to be utilized is not germane to the issue of patentability of the machine itself" *In re Casey*, 152 USPQ 235 (CCPA 1967) and "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" *Ex parte Masham*, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987). Regarding claim 2, said first side is substantially vertical relative to the floor (see Fig. 1). Regarding claim 3, said first side and said second side are not symmetrical (see Fig. 1). Regarding claims 5 and 6, an absolute value of a difference between the angles of the first and second sides comprise a range of 15 to 25 degrees (see Fig. 1). Regarding claim 7, EP '342

Art Unit: 1723

discloses a mixing apparatus for mixing livestock feed, said apparatus comprising a container (1) for the reception of feed; said container including a floor (6), a wall extending away from the floor, the arrangement being such that substantially all of said wall is disposed above the floor, said wall defining a top opening remote from the floor, said floor and said wall defining an enclosure (see Fig. 1); a discharge opening (51) in said wall; and an auger (2,3) disposed within said enclosure, said auger having an axis of rotation extending substantially vertically through the floor, said wall further including a first end (the right side in Fig. 2) and second end (the left side in Fig. 2) positioned on opposing sides of the enclosure, said wall further including a first side (right side in Fig. 1) and a second side (left side in Fig. 1) positioned on opposing sides of the enclosure, a first angle between said second side and said axis being greater than a second angle between said first side and said axis (see Fig. 1). Claim 7 and 29 discuss an intended direction of travel during an intend use; however, "the manner or method in which such machine is to be utilized is not germane to the issue of patentability of the machine itself" *In re Casey*, 152 USPQ 235 (CCPA 1967) and "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" *Ex parte Masham*, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987). Regarding claim 8, said first side is disposed substantially vertical relative to the floor (see Fig. 1). Regarding claim 9, said first side and said second side are not symmetrical (see Fig. 1). Regarding claims 13 and 14, an absolute value of a difference between the angles of the first and second sides comprise a range

Art Unit: 1723

of 15 to 25 degrees (see Fig. 1). Regarding claims 25 and 26, the first side is vertical (see Fig. 1).

6. Claims 15, 16, 22, 27 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Wosmek (US 2,894,733). Regarding claim 15, Wosmek ('733) discloses a mixing apparatus for mixing livestock feed, said apparatus comprising a container (12) for the reception of feed; said container including a floor (16), a wall extending away from the floor, the arrangement being such that substantially all of said wall is disposed above the floor, said wall defining a top opening remote from the floor, said floor and said wall defining an enclosure (see Figs. 1 and 2); an auger (23), including an upper end unsupported by external support and a lower end, disposed within said enclosure, said auger having an axis of rotation extending substantially vertically through the floor, said wall further including a first side (right side in Fig. 2) and a second side (left side in Fig. 2) positioned on opposing sides of the enclosure, said first said and said second side are disposed parallel to a direction of travel of the mixing apparatus (see Figs. 1 and 2), a distance between said axis of rotation and an upper part of said first side wall being shorter than the distance between said axis of rotation and an upper part of said second side of said wall. Regarding claims 16 and 27, said first side is disposed substantially vertical relative to said floor (see Figs. 1 and 2). Regarding claim 22, a discharge opening is located in the second side (see Fig. 2). Regarding claim 30, said first said and said second side are disposed parallel to a direction of travel (see Figs. 1 and 2).

Art Unit: 1723

Allowable Subject Matter

7. Claims 4, 12, 18 and 23 are allowed.
8. Claims 10, 11, 21, and 24 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant discusses an intended direction of travel during an intended use; however, "the manner or method in which such machine is to be utilized is not germane to the issue of patentability of the machine itself" *In re Casey*, 152 USPQ 235 (CCPA 1967) and "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" *Ex parte Masham*, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

10. While Wosmek (US 2,894,733) does disclose a sleeve (26) surrounding an upper portion of the auger, there is no reason to believe that this supports the auger.

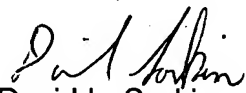

Nevertheless, reference discloses both the presence and absence of the sleeve stating at col. 2 lines 9-10, "Preferable and as shown, the upper end of the vertical conveyor 23 is housed with an elongated sleeve". One of ordinary skill in the art would understand this as a disclosure of embodiments of the invention with and without the sleeve being present, with the sleeve being present preferable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David L. Sorkin whose telephone number is 571-272-1148. The examiner can normally be reached on 9:00 -5:30 Mon.-Fri..

Art Unit: 1723

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L. Walker can be reached on 571-272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
